Multi-Dimensional ISS internal multiple **elimination** (numerical test)

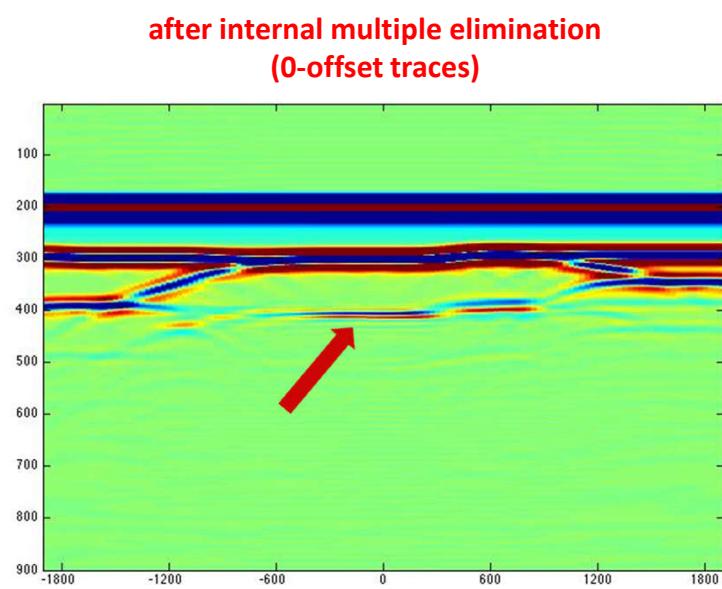

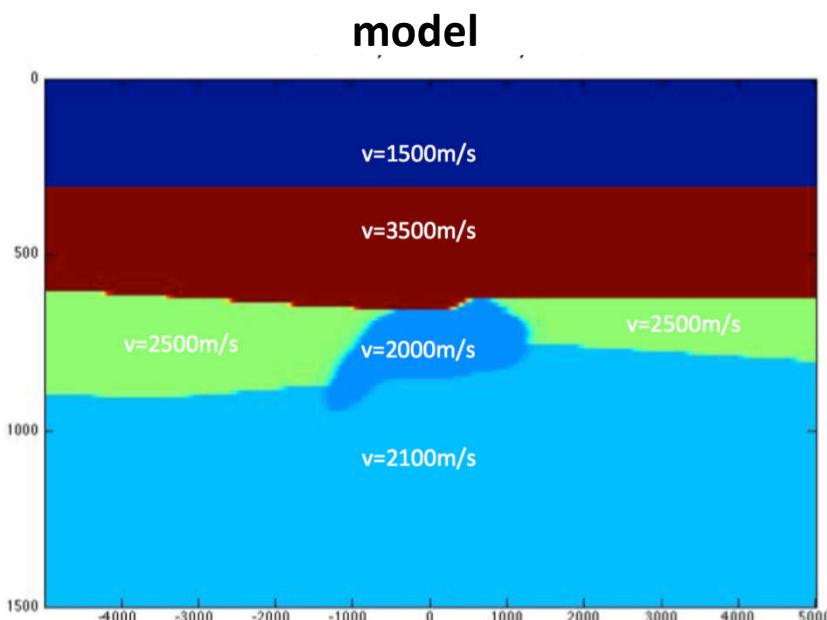

after internal multiple attenuation
+ energy minimization adaptive subtraction
(0-offset traces)

For the case of an interfering internal multiple and base salt primary, the ISS internal multiple attenuation + adaptive damage the primaries
(Yanglei Zou, Chao Ma and A. Weglein, 2018)

Multi-Dimensional ISS internal multiple **elimination** (numerical test)

For the case of an interfering internal multiple and base salt primary, the ISS elimination removed the internal multiple without damaging the primaries
(Yanglei Zou, Chao Ma, and A. Weglein, 2018)
